

# TITANIUM CROW BAR

## A HAND MADE BESPOKE TOOL - MADE IN NEW ZEALAND

The ultimate crow bar. Made from Titanium

**FOSSICKING** - for gold, moving rocks or digging in remote locations

**DIVING** - fresh water or salt water

**WORK** - remote difficult locations

**CAVING** - Leverage where you need it in tight places

**CLIMBING** - Move dangerous loose boulders and rocks whilst setting new routes

Thickness - 20mm  
Length - 630mm  
Full Length - 720mm

Titanium - 976 grams  
Steel - 1679 grams  
42% lighter than Steel

**TITANIUM** - This wonderful material is individually crafted into a quality tool. First forged locally, with the ends bent at 90 degrees and 15 degrees respectively, then ground, and finally polished by hand. All here in New Zealand. No rust or corrosion, even in sea water. Made from solid Titanium, stronger than steel. (highest strength to weight ratio of any metal) Hypoallergenic :- ) Non magnetic! Highly resistant to acids.
